Airwatch

Dear Parents,

At Good Shepherd, we use *Airwatch* as an integral part of our BYOD program. *AirWatch* is a corporate Mobile Device Management system (MDM) allowing us to manage a diverse range of Mobile Computing devices. It assists in the streamlined use of mobile learning environments that enhance student's learning. *AirWatch* has the functionality to download applications (apps) to devices, set restrictions, and install certificates allowing the device to operate on our network. *AirWatch* also ensures that the device is in a secure state.

This is an initiative of the Catholic Education Office that will support us in providing the best BYOD program possible.

Please install the free *Airwatch* agent app on your child's device. Teachers will complete the enrolment in class next year. Search "*Airwatch agent*" in the app store. The app looks like this:

Please see the attached information that should answer any questions that you have about Airwatch. If you have any further questions, please contact Luke Mooney (luke.mooney@cg.catholic.edu.au).

Regards

A handwritten signature in blue ink that reads "Luke Mooney".
